# DATABASE MANAGEMENT SYSTEMS II

# BIL-316

# Final Exam

**Project Title:** SaaS YT-Insights

**Report Date:** 30.01.2025

**Report:** 0 / 5

**Team:** Delta

**Team Members Name-Surname-ID:**

Daniel Kanybekov 2204.01002

Beksultan Egemberdiev 2204.01023

Nerayim Kerimova 2104.01005

**Project GitHub:** https://github.com/orgs/YT-Insight/repositories
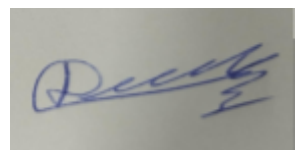

**Scrum Master Name-Surname:** Daniel Kanybekov

## Sprint Planning

Set up the project foundation, configure GitHub and Jira integration, and implement the initial landing page with responsive layout.

**Tasks:**

1. Set up the frontend project using Vue (SCRUM-5).
2. Create and configure the GitHub repository for the project.
3. Define and apply a Git branching strategy (`main`, `dev`, `feature/*`).
4. Connect GitHub to Jira and verify issue-based commits.
5. Conduct a kickoff meeting and align the team on sprint goals and workflow.
6. Implement the landing page layout based on the provided design.
7. Add mobile adaptation for the landing page.

**Sprint Cycle: 3**

**Daily Scrum: 15**
